Learn Three Ways To...

**Mastering
Spoken
English!**

Once you learn these three techniques... Your **CONFIDENCE** will **SKY-ROCKET!**

Dear Student ,

What you are about to discover has come from ten years of teaching English. I am going to share with you three fast ways to help you become a confident speaker in English., which has already already worked for the students I have had the pleasure of teaching.

You see we live in a 'new world' where our students need more than just going to school and their classroom teacher in order to thrive in education.

But yet with the world evolving and future jobs and careers becoming more competitive than ever.

The ability to speak English matters! Actually, your whole life could depend on it.

Which is why it's never been more important to set them up for success than ever before.

Did you know that an individual who speaks multiple languages is more likely to be employed in the future than an individual that doesn't?

So my goal with this guide is to equip you with three fast and actionable strategies to start helping you achieve your goals.

But First.... Why Should You Listen To ME?

My name is Aziz Khan. I am an English tutor.

I have been teaching since 2014.

During that time I have delivered more than 2,000 lessons delivered online.

So I want you to know you are in safe hands!

Here's why I decided to get into teaching...

Reason #1 - I love to help others and make a difference.

Reason #2 - I enjoy teaching English.

Reason #3 - I come from a family of teachers.

Now over the years I started to notice a trend....

The students I taught that were able to do three key things always managed to do better than those students who didn't focus on these three keys areas.

So I started to focus on these methods consistently with all of the students I've worked with and the results were incredible...

And now my mission is to help more students with these three key skills by getting this guide into the hands of more students who want the best for their life like you... So let's get started!

METHOD NAME

1 - Listen to Learn.

**2 - Copy a Native
English Teacher.**

3 - Practice with Idioms.

STEP ONE

Listen to Learn

1.

Listen to Learn

You may be very good at reading conversational English, but speaking English is very different.

Listening to a native English speaker will allow you to pick up certain behaviours when communicating in English.

For example, in your culture, there may be a greater focus on etiquette, or more importance on the content i.e. being direct. Listening to a native English speaker will allow you to make these adjustments from the textbook English you may have learnt.

One way of achieving this can be to listen to popular English sitcoms in the accent you desire e.g. American or British accent.

But the best way to listen to a native English speaker is learning from a Teacher. An English Teacher will give you the opportunity to listen and learn exactly how it should be done!

STEP TWO

Copy a Native English Teacher

2.

Copy a Native English Teacher

After you have listened attentively to a native English Teacher, it's time to copy them! Being able to speak English fluently in a business setting is a valuable skill in today's world, and learning from a Teacher will help you to achieve this.

When copying a native English Teacher, you will find that you're communicating with expansive vocabulary, but speaking in a way that is clear to all.

This action will allow you to feel like a native English speaker, and even be an English Teacher to someone else!

STEP THREE

Practice with Idioms

3.

Practice with Idioms

As you grow with confidence and you feel able to speak like a native English speaker, it's time to expand.

You can continuously improve by using idioms in your speech. Communicating with idioms shows you have a rich understanding of the English language, and that you're not afraid to break away from standard English.

Another way to expand your growth is introducing local dialect and/or slang into your speech. This can create a very powerful impression and show that you're a fully-fledged native English speaker!

What do you think of these three steps?

I hope you found them useful!
